

WORKSHOPS

ENERGY STORAGE IN THE CLEAN ENERGY FOR ALL EUROPEANS PACKAGE

22 May | 9AM-4.30PM | Brussels

CLEAN ENERGY FOR ALL EUROPEANS: NEW CHALLENGES, NEW OPPORTUNITIES

The Clean Energy for All Europeans Workshop offers a unique opportunity to industry, researchers, and policymakers to delve into the storage-related aspects of the package and debate the practical implications for the energy storage sector.

A diverse group of speakers will share their expertise, presenting innovative energy storage projects, tips to future-proof the energy storage business case and adapt to the new policy framework, and insights on the future services and revenue streams for storage that can be expected to emerge across Europe. Speakers and participants will also zero in on the practical implementation of the provisions on ownership by TSOs and DSOs, grid fees and taxes for storage, and other questions related to the implementation of the Clean Energy package.

Participants will also have the possibility to develop new synergies and expand their networks during the opening dinner taking place on 21 May 2019.

The Clean Energy for All Europeans Workshop is organised by the European Association for Storage of Energy (EASE).

TICKETS

EASE Members	€249
Non EASE Members	€299
European and National Institutions	Complimentary
Opening Dinner on 21 May 2019	Included

All prices are excluding VAT

Become a member today and enjoy the best rate for all EASE events!

ABOUT EASE

The European Association for Storage of Energy (EASE) is the voice of the energy storage community, actively promoting the use of energy storage in Europe and worldwide.

It supports the deployment of energy storage as an indispensable instrument within the framework of the European energy and climate policy to deliver services to, and improve the flexibility of, the European energy system.

EASE seeks to build a European platform for sharing and disseminating energy storage-related information and supports the transition towards a sustainable, flexible and stable energy system in Europe.
